This plan combines the Regional Plan, the Metropolitan Transportation Plan (MTP), and the Comprehensive Economic Development Strategy (CEDS) into one integrated plan.

For a healthy, inclusive, and prosperous community.

Adopted 6/19/2013

Chapter 3.3
3.3 Plan Accountability and Monitoring

Annual Indicators and Progress Report
In order to increase accountability for ECOS Plan implementation and results, we are proposing the following plan monitoring system. The system is intended to be tools through which the ECOS partners demonstrate results and continue to focus on collective impact. It is a part of demonstrating our efforts to do things differently, more effectively and efficiently through stronger partnerships.

It is likely that a memorandum of understanding will have to be developed and agreed to by the ECOS partners that commit to leading the collective impact strategies and to following through in monitoring our indicators and implementation of program level actions. There will be opportunities not apparent now to assist each other and achieve better results.

The indicators will be monitored on an annual basis in an Annual Indicator and Progress Report. This report will be guided by an ECOS Accountability Partnership made up of representatives of the ECOS Partners. This committee will be charged with improving partnership efforts and reviewing the draft Indicator and Progress Report and communications each year. Quarterly meetings are expected.

An Indicator Technical Committee made up of staff from the above organizations will provide technical support and make recommendations to the ECOS Accountability Partnership. It is expected that this group will meet quarterly or as much as needed to produce the Annual Indicator and Progress Report each year. The first year will take more time to finalize the indicators.

Performance measures will be determined by progress in implementing the projects identified in this Plan. ECOS Partners must commit to reporting their progress to the ECOS Accountability Partnership so that individual program results can be monitored and reported as part of the Annual Indicator and Progress Report. Changes in ECOS Plan strategies and actions may be made as deemed necessary.

It is intended that the Annual Indicator and Progress Report be reviewed with each of the partners’ boards to achieve maximum exposure and results from our collective actions.
